

Electric Locomotive of Swiss Railway, SBB Re 4/4 II

We are building the Swiss electric locomotive Art.Nr. 8500000, Re 4/4 II on a scale of 1:11 (5"). This Model will be an accurate copy of the original electric locomotive of the Swiss Railway SBB type Re 4/4 II, built in Switzerland by SLM (Swiss Locomotive Machine Factory, Winterthur). 273 locomotives of this type were built from 1964 to 1985 for the Swiss Railways SBB.

We are immediately ready to take orders for the Swiss electric locomotive Re 4/4 II.

Art.Nr. 8500001. kit Swiss electric locomotive Re 4/4 II consisting of:

2 chassis each with a drive motor 24 V / 750 W	1 set of cabling
1 steel chassis	1 electronic control 24 V with control panel (on the sidecar)
1 locomotive body	Non-painted (two lacquer finishes are available, either in the original green or red colours. Price on demand).
1 roof with structure	
1 set of screw couplings	
1 set of round buffers	

The price for the kits can change, depending on the specific requirements of the customer. The indicated price contains all indicated kit groups with assembly drawings, partly pre-mounted, non-painted and without batteries (two twelve volt sealed lead acid batteries 12 volt / 60 Ah can be placed in the loc), steel chassis welded, Locomotive body bent and welded in stainless steel sheet metal, roof formed and welded, set of cabling prepared to be connected, manuals for machine and control unit. Minimum curve 12 ft. See the prices for the locomotive numbers and letters, and manufacturers type plate on separate price list.

Kit standart, and finished model, without additional parts:

Kit: Item No. 8500001, non-painted, included equipment Pos. 2-6

Finished model: Item No. 8500000, **Red painted**, incl. Pos. 1-6

Finished model: Item No. 8500002, **Green painted**, incl. Pos. 1-6

Finished model: Item No. 8500003, **Cargo-Red-blue painted**, incl. Pos. 1-6

Finished Model: Item No. 8500004, „**LION**“ Red painted, **new SBB-Logo**, Pos. 1-6

Pos. Additional equipment, without assembly

- 1) Painting locomotive box, roof, current collector, framework, apron
- 2) Lokletters, manufacture signs, type and NR. - Signs
- 3) Pneumatic drive of the current collectors inclusive electrical valve
- 4) Air hoses 8 pieces, imitation, inclusive mounting plates apron
- 5) Apron guard plates 4 pieces, inclusive hook
- 6) Air brakes with cylinder, electrical valve and control
- 7) Pole connection to bogies
- 8) Deep-drawing device for the bogies
- 9) Battery shop from the outside, plug mechanism battery box
